

Site 2 – looking south or south-west

Site 3 – looking east or north-east

Site 4 – looking north-east, with drop to the road on the right.

Site 5 – looking north-east

Long Gully Wind Farm - Photographs

Site 6 – looking north

Site 7 – looking south-west with Scala probe in approximate turbine location

Long Gully Wind Farm - Photographs

Site 8 – looking north-east

Site 9 – looking west with Scala probe in approximate turbine location

Long Gully Wind Farm - Photographs

Site 10 – looking south with Scala probe in approximate turbine location. Te Kopahou trig point is in the background and the track is to the right of the photo.

Site 11 – looking south or south-west (location since altered)

Long Gully Wind Farm - Photographs

Site 12 – looking north-east with Scala probe in approximate turbine location and 1m-4m high fill batter beyond.

Site 13 – looking south-west with Scala probe in approximate turbine location

Long Gully Wind Farm - Photographs

Site 14 – looking south-west with the author standing approximately on the turbine location

Site 15 – looking south west. The proposed turbine location is about 15m from the road (location since altered)

Long Gully Wind Farm - Photographs

Site 16 – looking east with Scala probe in approximate turbine location (location since altered)

Site 17 - looking north with the author standing approximately on the turbine location (location since altered to lie on a flat platform in the background)

Long Gully Wind Farm - Photographs

Site 18 – looking south with Scala probe in approximate turbine location (location since altered)

Site 19 – looking south-west with Scala probe in approximate turbine location (location since altered to lie on the other side of the track in the background)

Long Gully Wind Farm - Photographs

Site 20 – looking south-west with Scala probe in approximate turbine location (location since altered)

Site 21 – looking east with Scala probe in approximate turbine location

Long Gully Wind Farm - Photographs

Site 22 – looking north-east with the author standing approximately on the turbine location

Site 23 – looking south-west with turbine location about 5m from author on left of track

Long Gully Wind Farm - Photographs

Site 24 – looking east with turbine location in centre of photograph a few metres off the left of the track

Site 25 – looking west with Scala probe in approximate turbine location (location since altered to be further up the hill)
